Environmental Policy

ENV-POL-001-02

Flush- Line Group Limited (“Flush- Line Group”, “the Company”) is committed to minimizing environmental damage and continually improving our environmental performance. We will consider environmental impact at the planning stage of all activities and maintain high standards in pollution control, energy conservation, resource management and habitat preservation. We recognize our responsibility to protect the natural environment and prevent pollution.

To implement this policy, Flush- Line Group will ensure that site management and supervisors understand the environmental impacts of their activities and are empowered to mitigate these impacts. Additional training will be provided as needed to enhance awareness of environmental issues.

For each contract, Flush- Line Group will seek the best environmental advice from clients. If our clients, often as Principal Contractors, have ISO 14001 environmental management systems, we will support and implement these systems as required. We will comply with all relevant environmental laws and any additional requirements we may subscribe to. During our operations, we will organize and manage our work to minimize environmental impacts related to:

- Noise, odour, and dust contamination
- Effluent and waste generated by our activities
- The storage and transportation of hazardous (COSHH) materials and other substances

Our approach is straightforward: Reduce waste, Re-use materials where possible and Recycle appropriate materials. We will propose alternatives to client specifications if the 3Rs (Reduce, Re-use, Recycle) are not fully utilized. We will take necessary precautions to protect adjacent land, buildings, and the public from any harm, discomfort, or nuisance.

In line with this policy, environmental considerations will influence our choice of materials and suppliers, prioritizing sustainable sources wherever feasible. All waste will be disposed of responsibly, using licensed hauliers and approved disposal sites. Relevant certifications will be obtained for each contract to ensure compliance.

To manage and improve our environmental impact, we will establish, monitor and review environmental objectives regularly. These objectives have been assessed and audited internally by UKAS-accredited external assessors as part of our commitment to ISO 14001 accreditation. All Flush- Line Group personnel will be informed of this policy and its requirements. We will work collaboratively to promote and implement best environmental practices throughout our organization.

Approval

This policy has been approved by the Board of Directors of Flush- Line Group and will be reviewed annually.
